AUTOPROGRAM
The MPS 4000 comes with welding expertise already built-in. Power Source Controls stand out for their simplicity and ease of operation. Just set the wire diameter and type of material to access the factory preprogrammed optimized parameters that are stored in memory. The single-knob operation in synergic mode makes this job even easier. Power output is precisely synchronized with wire speed and is adjustable through its full range with the turn of a single knob.

PRECISE ARC LENGTH REGULATION – AUTOMATICALLY
Digital technology maintains a constant arc length with microsecond response to change in stick out. Regulated process eliminates spatter.

CONTROL PANEL – TELLS YOU ALL YOU NEED TO KNOW
• Before welding, programmed values are displayed. During welding, actual values are displayed
• At weld completion, actual values are stored and displayed by “Hold” function
• Single point settings of wire speed and voltage can be stored and recalled allowing instant access to optimized parameters for specific jobs
• Warnings are displayed: Over temperature and low water level
• Error codes allow rapid diagnosis of problems
